COOL CREATOR

Easy & affordable solution to spot cooling

www.cool-creator.com

30 years back Pedestal Fans were largely used in Functions for cooling purposes. We were the first in Mumbai 30 years back to introduce the concept of Air Coolers. We provide Air Coolers on Hire for every type of events and also corporate functions.

Our New Big Cooler gives more than 4 times the cooling effect of Air-conditioner and consumes less power. Unlike Air-conditioners, Coolers does not have an exhaust problem of heat air. We introduce our self as Cool Creator pioneer supplier of Air Cooler with quality service for every type of events & corporate function...

We are since 1983, first to introduce the concept cooling area by Air Cooler, which is cheaper than the cost of AC & consumes less power. For better cooling we use Ice instead of water.

We believe our success depends upon offering quality service & client satisfaction. Our new Chiller Cooler gives more than four times the cooling effect of air conditioning. It doesn't require exhaust duct like an AC also requires very less power. It is the perfect solution for spot cooling. It can be easily movable and can be used in open area.
