Elpro Technologies

www.elprotech.co.in

We are adept manufacturers, wholesalers, traders, retailers and suppliers of Software and Hardware Products. Our specialty lies in providing unique technological solutions for industrial uses.

About Us

Our organization, **Elpro Technologies**, was established in the year **2007** as a prime manufacturer, wholesaler, trader, retailer and supplier of Software and Hardware Products. Our reputation within the industry is preceded by the production of a unique range of products which includes Industrial PC, Fanless Computer and Single Board Computer amongst a vast range of other functional products. We make extensive efforts to deliver the best services to our clients by constantly endeavoring to produce unmatched products that are unique to our organization. We strive to maintain cordial business dealings with our existing clients and yearn to incorporate more associations within our circle of mutual business productivity.

We established the premises of our organization within an infrastructural base of modern excellence. Our state of the art campus is segregated into various divisions pertaining to separate roles and responsibilities. Each department within our organization houses experienced professionals with vast industrial knowledge and experience, who work round the clock and render their best services to facilitate unhindered flow of productivity. Our manufacturing division makes full use of modern machinery embedded with precision software to ensure impeccable functionality in our products. We maintain a strict assurance of quality to help our clients avail productive and long lasting products. Our efforts lie in ensuring a fully satisfied base of clients, which is why we make extra efforts to maintain communication and act of feedback.

Under the invaluable guidance and mentorship of our manager of marketing, **Mr. Ghani Khan**, we strive to achieve high rates of success in the years to come. We consider client satisfaction our solemn duty and yearn to achieve that through constantly outperforming our contemporaries.
